

0.1 Spodder

May 2019 - Aug 2020

Failed Startup

Compared the reservoir computing grid model before and after the addition of positive and negative emotion regulation mechanisms by using Matlab programming.

Improved the accuracy of the algorithm in predicting the spatial and temporal evolutionary features of the dynamical system by adjusting the activation function and specific parameters of the neural grid.

0.2 Greenboard

Aug 2016 - Dec 2016

Failed Startup Used React, Next.js, and Elasticsearch to build a web app for prospective graduate students to upload information about their applications and acceptance status.
